Abstract

The recent introduction of the technique of Gene Editing in autism research has opened up the debate as to whether this approach is a step forward in the right direction or is an example of a regressive approach in the field of autism diagnosis and treatment, filled with ethical issues of potential for misuse and abuse in human embryos. This article establishes the advantages of Autism Brain Theranostics over Gene Editing in Autism.

Keywords: *Autism Brain Theranostics; Gene Editing; Gene Editing in Autism; Applied Energy Medicine; Applied Intentional Epigenetics; Evolved Intelligence (EI); Autism Cure; Autism Diagnosis; Autism Treatment*

Introduction

The pertinent question that needs to be answered is this - When non-invasive, advanced, scientifically proven human technological modalities such as Autism Brain Theranostics are already available today and are already showing the results of autism cure on the ground, Why the unnecessary need for gene editing in autism?

This article establishes the advantages of Autism Brain Theranostics over Gene Editing in Autism. To familiarize oneself with the leading-edge science of Autism Brain Theranostics it is recommended to read the article titled 'What is Theranostics in Autism? The Emerging Revolution in Autism Diagnosis and Treatment that is Leading the Way in Brain Theranostics Today' (published in the journal - Theranostics of Brain Disorders, Juniper Publishers, Volume 2, Issue 3, November 2017). It is available at the link here: <https://authenticautismsolutions.com/wp-content/uploads/2017/12/Autism-and-Brain-Theranostics.pdf>

Here is a description of a few terms that will help understand this article and the accompanying table, in perspective.

Autism Brain Theranostics: Diagnosing and Treating the Energy Disturbances in the Autistic Brain by using the one and the same Tools of Energy Assessments and Applied Energy Medicine along with Applied Intentional Epigenetics. Theranostics, in simple terms, means Diagnostic and Therapeutic modalities, techniques, procedures or tools combined into one. In other words, there are Two aspects integrated in the term and those are - Therapeutics and Diagnostics. In the context of autism what this means is - Any tool, technique, modality or procedure which does the "double duty" of not only Diagnosing Autism but also Treating/Curing/Healing Autism. (And by treating/curing/healing what is meant is the Disappearance of the Limiting Symptoms of autism). This is possible by applying EI or Evolved Intelligence. And this EI is the advanced Human Technological Abilities of Remote Sensing, Remote Viewing and Remote Healing. All of these applied Simultaneously. Which is why Autism Brain Theranostics is both - A cutting-edge science of Diagnosis as well as Treatment/Therapy of the disorders in the brain of the autistic child/person caused due to Energy Disturbances. Because, all the limiting symptoms in Autism

is caused due to the underlying Energy Disturbances in the Energy Fields of the autistic child/person, including the energy disturbances in the brain of the autistic child. Epigenetics literally means “control above genes”. Applied Intentional Epigenetics is the art and science of applying techniques that bring about epigenetic transformations in a being or system using the power of Intention in any way, shape or form. It brings about these transformations at the level of the genes and the DNA of the being by bringing about Energy Shifts within the patterns encoded in the DNA, among other things. Applied Intentional Epigenetics thus has an underlying Energy Medicine basis to it. Energy Medicine is the art and science of restoring a being/system to its natural state of well-being and wholeness by augmenting the innate ability of the being/system to heal itself on all levels by bringing about shifts in the energy fields in the being/system to resonate with its natural frequency of alignment, balance and harmony.

Gene Editing is using modified enzymes that allows researchers to reach into the genome and snip, or substitute, DNA sequences with relative precision and efficiency. In the content of Autism, autism gene editing is being done by using a modified enzyme called CRISPR that allows researchers to tweak DNA directly in a single-cell embryo, so that it is present in every resulting cell in the body of primates, including humans. Some researchers are using CRISPR to generate a breeding colony of marmoset monkeys with autism mutations.

The table below summarizes the advantages of Autism Brain Theranostics over Gene Editing in autism that establishes Autism Brain Theranostics as the progressive and evolutionary way forward in Autism diagnosis and treatment.

| Gene Editing in Autism | VS | Autism Brain Theranostics |
|--|---|---|
| Using modifications of Enzymes to reach into the genome and snip or substitute DNA sequences | DEFINITION  | Diagnosing AND Treating the Energy Disturbances in the Autistic Brain by using the one and the same Tools of Energy Assessments and Applied Energy Medicine along with Applied Intentional Epigenetics. |
| Still in nascent stage being experimented in animal models with lack of definite protocols or designs. Imprecise as there are thousands of autism-linked mutations described | EBM (Evidence Based Medicine)  | Backed by Practical, Leading-Edge Sciences such as Applied Energy Medicine and Applied Intentional Epigenetics. Already established as Autism Treatment Modality |
| Regressive Going down the path of the already failed Human Genome Project deeper into the "problem" of Autism rather than the Solution | ADVANCEMENT  | Progressive, Evolutionary and Revolutionary Moving forward on the path of Autism Solution. Provides scientifically proven Autism CURE . |
| Imprecise and Experimental. Does not come under Precision Medicine Still in "Rat Models" / Animal Model Trials | PRECISION MEDICINE TEST  | Highly Scientific Precision Medicine in Action Already being applied in Autistic human beings with proven Results on the ground in autistic people from over 25 countries in the world |
| Invasive and with unknown results, repercussions and side-effects | EASE of DELIVERY  | Non-Invasive and with Immediate Results seen as Improvements in Autism limiting symptoms. Free from side-effects. |
| Unethical, as there are Ethical Issues of "Gene Fixes". Potential for misuse in Human Embryos is High | ETHICS  | Highly Ethical . Autistic person and their families are in full control of applying this on their own in an Empowering Manner |
| Dependence on Unpredictable AI (Artificial Intelligence) Assistance | NATURE  | Self-Regulated by Real-Time EI (Evolved Intelligence) Guidance. Holistic Long-Term Solution in Autism. |
