Abstract

The Flu season has already started. New Flu Variants are being discovered by various Health Organizations around the world. They usually deal with the severity of such types, the new symptoms of such types, how different the new “strains” are from the one from previous years or how they differ from Covid-19, which is the Primadona of Flu viruses. Vibrational Medicine, as we use, based on our interpretation of the “Ancient Laws of Wisdom”, deals with viruses in a different way. We deal in the energies of the four components of a “Virus”, and how can we eliminate them, quickly and efficiently, for the welfare of mankind. We demonstrated our skill during the Covid-19 pandemic, where we identified all three main categories of Covid-19, and analyzed their energy patterns, then designing the most effective cure, to eliminate any of the Covid-19 strains in 24 hours, 2 capsules of the cure every 12 hours. The various Flu viruses are analyzed, their energies measured, and then compared with the spectrum developed by the Covid-19 virus. Whatever variance appearing from the Flu virus, usually is within the spectrum of energies of the Covid-19 Virus. If not, then a special cure is prepared for it. We introduced additional viruses, such as the Noro virus, the RSV virus and the 1918 flu virus as a comparison with the current Flu Viruses. It appeared that the Covid-19 cure, Vibrational Herbal Cure, made in 2020, eliminated all of the flu viruses and variants, within the spectrum of Covid-19 energies spectrum, appearing on the stage. It is also interesting to note that the Vibrational Herbal, 9-month anti- covid-19 vaccine, also worked on all these similar new strains and viruses.

It is also important to note that checking the famous Covid-19 vaccines, appearing by various Pharmaceutical Companies, varied in effectiveness, against Covid-19, but usually were not very effective with Type I Covid-19. It also seemed that because of the difficulty in totally eliminating some of the Covid-19 Virus, some traces of the Covid-19 virus lingered on and caused different health problems with certain people. By eliminating such traces, patients regained their well-being, while others had to be treated, to eliminate an interaction between, as an instance, Cortisone and Covid-19 remnants, and could only be eliminated by eliminating the energy due to the Cortisone in the body. Some long-term effects may still appear from the Pandemic of Covid-19.

Keywords: *Flu Viruses; Covid-19; Vibrational Medicine*

Introduction

This is January 2026, talk about the flu and the new variants are filling the waves and all the social media posts. Research Institutes, Hospitals and Doctors are advising us, about these new strains.

Since we wrote about Covid-19, when the epidemic was spreading in 2020, with our totally different approach to analyzing it; making a cure, and then creating a nine- month effective vaccine against all 3 types of covid-19, we have been studying Covid-19 and its variants

and derivatives. The cure, being based on the concept vibrational medicine, and although it is highly effective in eliminating the Covid virus, and most of its variants in 24 hours, it only saved those who took it, as it was not mass produced, maybe because it is so effective.

Our objective in this manuscript is to analyze the several new strains or variants, using the same methodology of vibrational medicine, and discover how to eliminate these new Variants; whether by using the Covid-19 cure, or whether they need a new treatment. Our effective 24-hour cure for Covid-19, appeared to be like a wide spectrum cure, eliminating many different strains of Flu between the value of the highest Covid-19 "Q" and the lowest value, that we had determined previously.

These values are "Q" = -32 the largest, and the smallest "Q" = -24.

We also may state that most, if not all chemical Vaccines, are not more than 80% effective against type II and type III covid-19, its effectiveness against Type I is usually less than 50%.

We have also detected that some patients who contracted Covid-19, in any of its three types, had some Covid-19 energies, as remnants, that caused severe problems in certain cases.

Procedure

The vibration medicine method depends on the measurement of the energies of the virus: Q "CHI", YIN (Yn), YANG (Yg) and the "well-being" measured by OMEGA (Ω). The determinant factor in the computing the power of that particular virus and its destructive strength, is its power. This is the power of the replicating part of the virus and is measured as 10 to the power of 1350 (or multiples of that).

Covid-19 has three strains:

- Type I: in which Q = -32, Yn = -32, Yg = -32 and Ω = -14
- Type II: in which Q = -28, Yn = -28, Yg = -28 and Ω = -12
- Type III: in which Q = -24, Yn = -24, Yg = -24 and Ω = -10.

The basis of the Covid-19 Flu power was 10 to the power of 1350. Thus, the design of the cure was to be able to embrace all of the different types (I, II, and III) under one cure, to be effective in all types. It seems that its effectiveness extended to other Flu viruses under the same power. During the period of extreme Covid-19 agitation, most variants were under the three types, I, II, and III. Thus, the cure worked fantastically with Covid-19, in any variant. Our work was limited by word of mouth. Although we presented our findings to the patent Office, in Cairo Egypt, and it was accepted under review. However, under Government decrees, we were prohibited from making any clinical trials, anywhere in Egypt. However, the success of the cure spread by word of mouth, and saved many lives at the nick of time. One Universal cure was made and it eliminated any of the three types in 24 hours, 2 capsules every 12 hours.

New flu virus

In December 2025, this is the new virus detected in the UK, with various outbreaks in USA and some parts of Europe. Some of these Flues and labeled as "A dangerous strain".

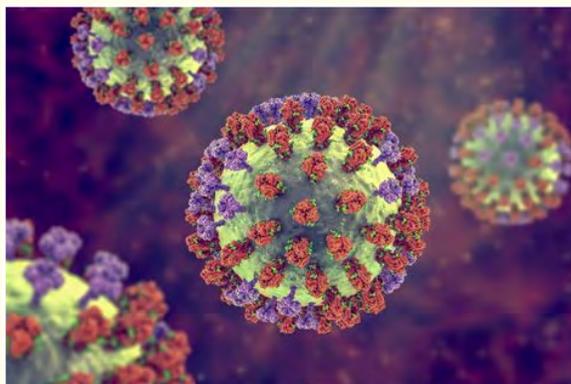

Figure 1

The energy characteristics of this virus is as follows:

- $Q = -28$
- $Y_n = -28$
- $Y_g = -28$
- $\Omega = -16$.

These values coincided with our previous findings concerning the different types of Covid-19.

This appears to be typical type II, and when tested virtually, the cure eliminated the energies of the virus in a 24-hour period. Two capsules of the cure, every 12 hours.

These values lie within the limits of the Covid -19 parameters. We need to check if this virus is susceptible to the 24-hour cure. The energies of this virus were totally eliminated by two capsules every 12 hours of the cure. $Y_n = Y_g = \Omega = 0$ by 4 capsules each of 900 mg of the cure.

The Flu virus of 1918

Figure 2

The above is the Flu virus of 1918 (www.abc.net.au).

The power of the replicating part of the virus is 10 to the power of 1530.

This lies above the level of covid Flu types.

Checking the energy characteristics of the ancient virus, since it was so devastating then:

- $Q = -36$
- $Y_n = -36$
- $Y_g = -36$
- $\Omega = -24$.

These values are quite high, and to characterize the energies of the 1918 virus, must have been a total catastrophe. The death toll was in millions, and it took many years for the world to recover.

Today, the treatment of that Flu may not be that hard. It appears to be stronger than SARS, but we have a cure for SARS. If need be, we may design a cure for the endemic that killed millions, many years ago.

The latest Flu, circulating around the globe

The following is the latest Flu depiction as the latest spreading in different places in the world, with several slight variations, that may not affect the existing cure.

Figure 3

The latest Flu 25-1 strain which has the following characteristics:

- $Q = -28$
- $Y_n = -28$
- $Y_g = -28$
- $\Omega = -18$.

The power of the replicating part of the virus is 10 to the power 1350.

These values are within the limits found for the three main strains of Covid-19.

These were:

- $Q = -24$ and -32
- Y_n were between -24 and -32
- Y_g were between -24 and -32

Omega Ω were between -12 and -18 , the replicating power of this virus is 10 to the power of 1350.

As a comparative example, the energy Characteristics of the SARS virus were:

- $Q = -36$
- $Y_n = -36$
- $Y_g = -36$
- Omega $\Omega = -22$.

The power of the Sars virus were different from those of covid-19. SARS power of the replicating part of the virus is 10 to the power 1530.

The Covid-19 cure could not eliminate the SARS virus characteristics in virtual trials when tried. The resulting values in virtual trials were:

SARS	Treated with Covid-19 cure
$Q = -40$	$Q = -26$
$Y_n = -40$	$Y_n = -26$
$Y_g = -40$	$Y_g = -26$
$\Omega = -22$	$\Omega = -16$

Table 1

The treatment alleviated some symptoms but cannot be designated as a cure for SARS.

We had to design a specific cure for SARS, which totally eliminated the virus in 48 hours.

The H2N3 virus

The H2N3virus is depicted as follows:

- $Q = -28$
- $Y_n = -28$
- $Y_g = -28$
- $\Omega = -18$.

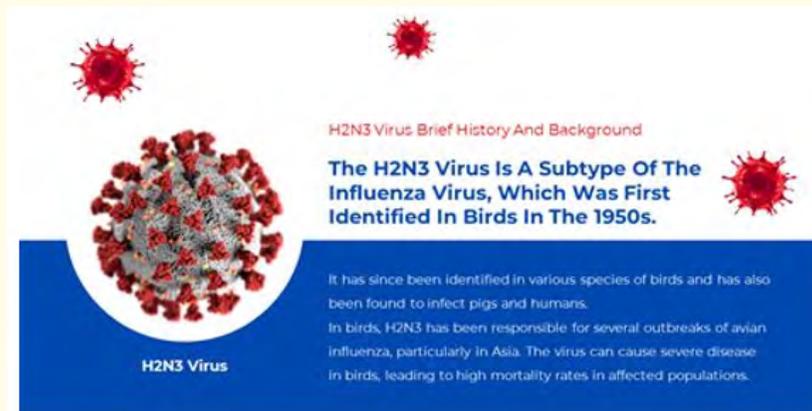

Figure 4

In virtual tests it was eliminated by our Covid-19 cure. It seems that the concept of using energies to determine the vulnerability of Flu viruses appears valid. However, the deadly case of Bird Flu H5N1, whose energies are: $Q = -36$, $Y_n = -36$, $Y_g = -36$, and $\Omega = -20$. The Covid-19 cure does not cure this type, but reduced the energies as follows: Q became -20 , $Y_n = -20$, $Y_g = -20$ and $\omega = -12$. It would need a special cure for it.

Respiratory virus (RSV)

Its energies are $Q = -30$, $Y_n = -30$, $Y_g = -30$ and $\Omega = -19$. The application of Covid-19 cure did not totally eliminate the energies; it needed a new cure to totally eliminate it. It changed $Q = -16$, $Y_n = -16$, $Y_g = -15$, and $\omega = -5$. However, we tried the Covid-19 herbal vaccine, and it eliminated the RSV virus in 36 hours, (two capsules, every 12 hours, three times).

The cure was made and was quite effective, but was not in demand, so it was not produced in any quantities.

New virus appearing in 2025/26

This virus has the following characteristics,

This is virus B Flu: Replicating part is 10 to the power of 1350. This lies within the Covid-19 range we calculated earlier. The energy characteristics if this virus is as follows:

$Q = -28$	Some specimens were detected as $Q = -32$
$Y_n = -28$	$Y_n = -32$
$Y_g = -28$	$Y_g = -32$
$\Omega = -16$	$\Omega = -18$

Table 2

However, both values are within the Covid-19 range and are totally eliminated by our vibrational herbal cure.

The power of the replicating part of this virus is 10 to the power of 1350, similar to that of Covid-19.

Figure 5: Source: Flu B (edition.cnn.com).

NORO virus

The energies of this virus are as follows: $Q = -30$, $Y_n = -30$, $Y_g = -30$ and $\omega = -14$. The symptoms of this virus are different, and may manifest itself in different ways. The Covid-19 cure has an effect on the NORO virus, but the dosage has to be increased. Although the cure works, and it eliminates parts of the energy of the virus, but to totally eliminate it, the dosage is administered, two capsules every twelve hours for two days.

The various types of covid-19: Type I, II, and III

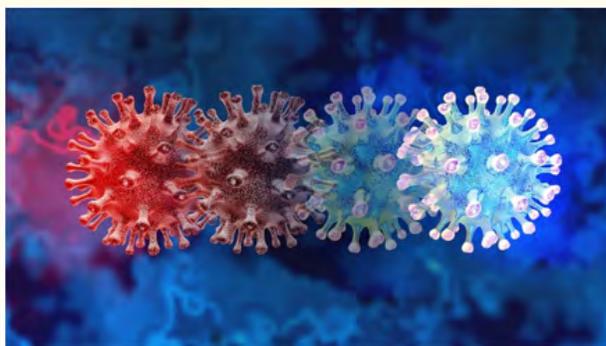

Figure 6: Source: (Intermountainhealthcare.org).

Covid-19 strains as of 2021. The power of the replicating part of the virus is 10 to the power of 1350.

From left to right:

- A is type I, of Covid-19, its characteristics are: $Q = -32$, $Y_n = -32$, $Y_g = -32$ and $\Omega = -18$
- B is type II, of Covid-19, its characteristics are $Q = -28$, $Y_n = -28$, $Y_g = -28$ and $\Omega = -14$
- C and D are both type III of Covid-19, and their characteristics are $Q = -24$, $Y_n = -24$ and $\Omega = -10$.

To clarify the difference between the Covid-19 and the SARS Virus, the characteristics of the SARS virus are, $Q = -40$, $Y_n = -40$, $Y_g = -40$ and $\Omega = -20$. Another covid-19 variant which was labeled XEC variant had the following characteristics; $Q = -26$, $Y_n = -26$, $Y_n = -26$ and $\Omega = -15$. Whereas the energies of the three Covid-19 Types are mentioned above.

Other deadly viruses

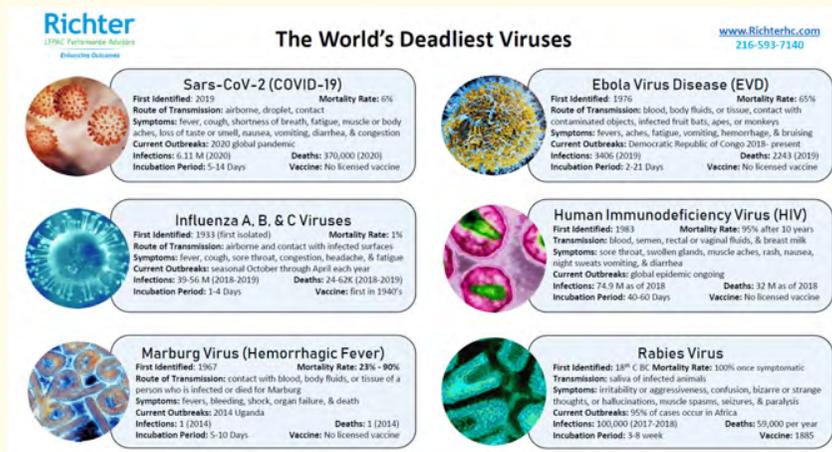

Figure 7

SARS-COV-2 (COVID-19) (www.hopkinsmedicine.org)

This is the adapted version of SARS to infect humans, its energies are as follows: $Q = -32$, $Y_n = -32$, $Y_g = -32$ $\Omega = -18$. They are all within the energy range of Covid -19 and are eliminated by the Herbal cure.

Human immunodeficiency virus (www.hopkinscience.org)

For many years after its discovery, it remained an enigma. Many tried to discover its secrets, but it remained a mystery. We tried, during the early years, to discover its energies. We studied many patients who were infected with the virus, but were always dismayed that the energies were different. Until it was revealed that HIV is an auto immune disease, and to us that meant that it is composed of several CVS'S. The total energies of the cluster containing the several viruses within the cluster were: There is a mixture designed to cure HIV, depending on the number of CVSs in the cluster. $Q = -45$, $Y_n = -45$, $Y_g = -45$, $\Omega = -28$. Our findings were published as an article in [20].

Ebola virus (www.hopkinsmedicine.org)

Another one of the deadly viruses that is plaguing parts of the world. We have addressed this virus in a separate manuscript [21]. It is curable, and have been able to design a vaccine, effective for six months. We also have a cure, but it seems that although we believe that Herbal cures are as effective, if not more so, they are less harmful to the patients themselves. The energies of this virus are as follows: $Q = -40$, $Y_n = -40$, $Y_g = -40$, and $\Omega = -20$

Another deadly virus is the MARBURG virus, which currently is plaguing parts of Africa, it is the hemorrhaging fever virus. Its energy characteristics are as follows: $Q = -40$, $Y_n = -40$, $Y_g = -40$, and $\Omega = -24$. We have been able to analyze and determine the size and the power of that Virus, however, we did not make any of that cure, which completely cures the virus in two days, made totally of herbs, as it would be difficult to market.

The HANTA virus

“Orthohantavirus is a genus of viruses that includes all Hanta viruses that cause disease in humans”. “They are naturally found primarily in mice” Wikipedia.

Another deadly virus and whose energies are as follows: $Q = -36$, $Y_n = -36$, $Y_g = -36$, and $\Omega = -24$.

The usual procedure is to discover its power, its size, if there are genotypes, and then design a cure that would work in just a few days. We have not made the cure, but we have the information to be able to do it in a short while. Its effectiveness can be easily done virtually, and its dosage also determined virtually.

Results

We have discussed various types of viruses, but mainly some of the Flu causing viruses and how they are characterized by medical science and what they are labelled. We have also explained what viruses are explained by using the methods used by the Ancients, specifically, the Ancient Egyptians. It lies in measuring the four main energies that define a virus, and then design a mixture to eliminate them. It may have taken many years but some order came out of it, in describing viruses. This is elucidated in manuscript [5].

There is the power of the virus, the part which is replicated to form the disease, the size of that virus, and how many, if any, genotypes or strains. A significant accomplishment, was the design of a 24-hour cure for any type of Covid-19 [9].

This is the cure that we keep mentioning, we view the Flu Virus as its energy, and whether or not, it is more or less than the energy of any of the Covid-19 types, if it lies within that range, the cure is effective regardless of what the symptoms of this new Flu is. We just may have to adjust the dosage initially intended. Another interesting development, is that the RSV virus may be eliminated, not by the Covid-19 cure, but by taking the Covid-19 nine-month vaccine. Two capsules, every 12 hours, three times. It appears that the cure made in 2020 to cure any of the Covid-19 types is still quite effective against most types of Human Flu viruses. Mutations such as that of the SARS virus, need a different type of cure.

Conclusion

1. From our investigations in the new wave of Flu in this season 2025-2026, it appears that mostly all of the Flu viruses lie within the range covered by Covid-19 cure herbal cure designed in 2020.
2. Regardless of the differing symptoms of some of the Flu viruses, the same cures may be used to alleviate the symptoms that occur in each type of Flu.
3. Some of these viruses are different and fall outside the range of the energy of Covid-19, and these require new cures. The RSV virus needs a new cure as its energy levels are different from those of Covid-19 cure.
4. There does not seem to be a consensus on a specific cure for Covid-19, there are several that may be used concurrently to complete the elimination of the Flu virus.
5. There seems to be certain controversy concerning Vaccines as a whole, in the USA, and this has affected the rates of vaccinations in the population as a whole. It has affected the regular Flu vaccinations, and most certainly those of Covid-19. What deepened the problem is the controversy concerning the alleged causing of certain reactions to those vaccines, so many years after their original usage.
6. Our previous analysis indicates that all of the chemical vaccines developed against Covid-19 were usually between 50 to 75% effective against certain types of covid-19.
